

TREE SHIELD

The Arbortech Tree Shield was developed to provide robust yet attractive tree protection, which has now found extensive application by local authorities and contractors in both city and urban locations.

- The shield is of sturdy, welded steel construction with an attractive black polymer alloy coating which is applied at high temperature.
- Thousands of units are now in use throughout London and other major UK cities.

Installation of The Arbortech Tree Shield is quick and easy.

- Simply position the two open halves of the shield in front of the tree and support post
- Link the two halves together using the two hinge clips provided
- Finally close the two halves of the shield around the tree and post and secure with staples to the back of the post, (see illustration).

N.B. Please also refer to our special packages on page 18 which offers the Tree Shield as part of the Arbortech system at a further discount.

TREE SHIELD

| Quantity | Discount | Unit Price |
|----------|----------|------------|
| 1 to 19 | 0% | £79.35 |
| 20 to 49 | 5% | £75.39 |
| 50+ | 10% | £71.41 |

Dimensions height - 1.83m
diameter - 350mm

Weight 2 Units packed - 15kg
